Monitoring Electrodes

COVIDIEN

positive results for life™

Experts on electrodes

Our complete range of high-quality electrodes offers options for all applications. We can help you select the right electrode for your specific purposes.

Covidien recommends...

Universal electrode – H34SG

50x45mm

Key highlights

- Suitable for all applications
- Radiolucent
- Extra strong adhesive
- Water resistant

Further details

- Carbon eyelet, certified radiolucent up to 3.0 Tesla*
- Pressure sensitive stress adhesive is extra strong
- Foam backing is water resistant and washable
- Fast formula solid hydrogel for even lower skin impedance than solid hydrogel
- High quality Ag/AgCl sensor
- Integrated abrader

*Complies with the requirements of German Medical Law and the European Medical Device Directive 93/42/EWG; Certificate No. 07-07, 30 August 2007

Covidien recommended electrodes

Additional electrode options

* Liquid gel electrodes result in very low skin impedance and are ideal for emergency applications, such as monitoring during and after defibrillation
 ‡ No adhesive: non allergic and allows repositioning and repeated use of an electrode on one patient

Alternative options...

Liquid gel electrode – H34LG

50x45mm

Key highlights

- Liquid gel – ideal for emergency applications, e.g. monitoring during and after defibrillation
 - Less need for preparing skin, which may save time and reduce costs
 - Enables faster reaction after electrode application as allows rapid and more effective decrease of skin impedance and provides excellent contact with skin
- Pressure sensitive adhesive is extra strong and skin friendly
- Foam backing is water resistant and washable
- High quality Ag/AgCl sensor

Oval shape electrode – H92SG

30x24mm

Key highlights

- Oval shape
 - Allows better positioning of electrode
 - Radiolucent & banana adaptor version available
- Foam backing is water resistant and washable
- Strong, skin friendly adhesive
- Fast formula hydrogel for even lower skin impedance than solid hydrogel
- High quality Ag/AgCl sensor

Small, radiolucent electrode – H135TSG

43x35mm

Key highlights

- Radiolucent carbon eyelet
- Small size allows better positioning of electrode
- Foam backing is water resistant and washable
- Strong, skin friendly adhesive
- Fast formula hydrogel for even lower skin impedance than solid hydrogel
- High quality Ag/AgCl sensor
- Non-radiolucent version available

Product	Order code	PC/Pouch	PC/Box	PC/Carton
H92SG	31.1925.21	50	500	6000
H34LG	31.1345.21	30	300	3600
H135TSG	31.1355821	50	500	6000

Monitoring accessories

Skin preparation product – Nu-Prep™*

Key highlights

- Improves tracing quality
- Improves electrode adhesion
- Reduces number of artifacts through reduced skin impedance
- Cleans the skin
- Three-year shelf life
