

Aneroid Selection Guide

Good. Better. Best.

Now it's easier to choose the right sphygmomanometer... than it is to pronounce it.

Easy Product Selection

With so many types of aneroids, understanding the subtle differences between them can be daunting. To make product selection easier for our customers, we recently changed the names of some of our popular aneroid product lines and added some new products:

GOOD medline**plus**

BETTER medline**pro**

BEST medline**elite**

To make it easier to choose the right aneroid accessories, we're including a handy cross reference at the back of this brochure.

Blood pressure screenings will always be one of a physician's most fundamental diagnostic tools.

Systolic and diastolic readings help to quickly alert doctors to potentially life-threatening illnesses. At Medline, we take pride in offering a full selection of aneroids to meet every clinical and budgetary need.

Exceptional Service

Our industry-leading team of representatives is always available to help explain the differences between each aneroid category and to help you choose the best products for your specific needs.
