Solon Care™

We believe our customers should never worry about quality and delivery when ordering value-priced disposable medical products. That's why our Solon Care medical products are made in ISO 9001-certified plants that are FDA-registered. This fine product line is produced using top-grade White Birch and medical-grade fibers and wrappers. That insures that the Solon Care name goes on only the finest patient care products.

Solon Manufacturing got its start in 1936 making wood products for the foodservice trade. Shortly thereafter, our Disposable Medical Products line was launched. From tongue depressors to cotton-tipped applicators to cervical scrapers, the Solon line provided optimum patient care. The expertise and knowledge we gained over the years have gone into the production of the Solon Care product line. Solon production managers work with the Solon Care plants to make sure that they adhere to our exacting product standards to give you superior value-priced items for your customers.

When you buy Solon Care products, you can count on the experience and pride of Solon Manufacturing's professionals to provide the quality, prompt deliveries and courteous service that your business requires. From the distinctive packaging to the excellent products inside, the Solon Care line conveys concern for providing the best patient care products. Call us today to add Solon Care to your product offerings.

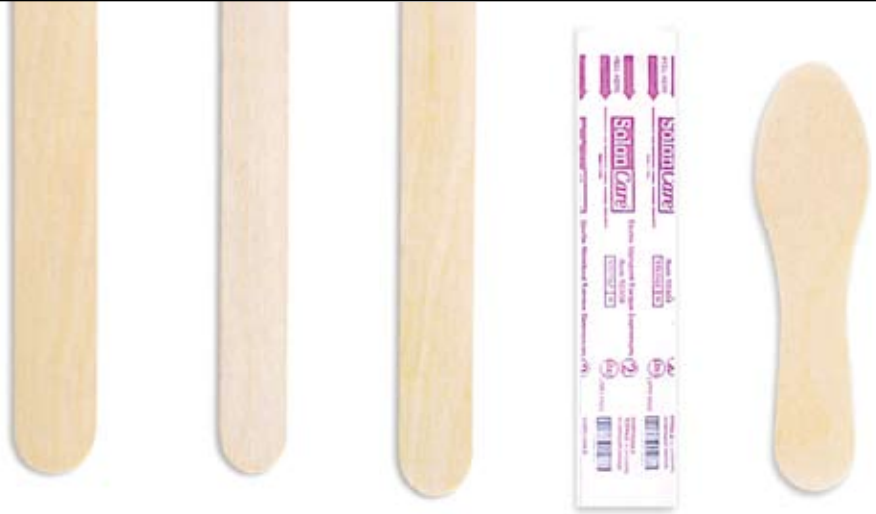

Tongue Depressors & Medical Spoons

Our tongue depressors are made from close-grained White Birch. This select wood provides a smooth finish. It has no taste or odor and maintains a high strength.

In addition to oral use, our tongue depressors are ideal for spreading ointments and salves, and for stirring and mixing medications. Industrial needs, such as application of paint or glues, are also well-served by this line. Available in plain, wrapped, and sterile styles with an option of customized printing on wrappers.

Medical spoons are made of biodegradable White Birch. Our wooden medical spoons are more resistant to shattering than breakable plastic spoons and are useful in feeding wet medications to long-term care patients.

Cervical Scrapers • OB-GYN

Our cervical scrapers are hand-selected and polished for optimum patient care with a smooth finish. Made from White Birch, these scrapers are durable and useful for a variety of purposes.

The 8-inch OB-GYN applicators are rayon-tipped and configured to facilitate the preparation of the vaginal area for examination. The 16-inch proctoscopic applicator has a larger surface for optimum preparation of the sampling area. Both applicators may be autoclaved and may also substitute as an oral or throat applicator or for topical use.

Applicator Sticks & Orange Sticks

Applicator sticks are used for specimen transfer, mixing sticks, and for industrial applications. Made of White Birch, applicator sticks are round with square-cut ends.

Orange sticks, or cuticle sticks, are round with beveled ends. They are used both for patient care and for industrial applications.
